Raam Pujangga Sadewa

Product Designer — Checkout, Payments & Marketplaces · Research-led, builds in code

Jakarta, Indonesia (Remote, UTC+7) · raamps3@gmail.com · +62 831 7185 4811 · Portfolio · LinkedIn · GitHub

SUMMARY

Product Designer with almost 7 years designing checkout, payments and marketplace products for teams in Indonesia, Singapore, Sri Lanka, the US and New Zealand. At FLIK I own merchant products end-to-end, from requirements and PRDs through design, QA and launch, and build in code with AI-assisted development (Claude Code). Research-led: funnel data, shadowing, unmoderated and guerrilla testing. Computer Engineering graduate, former design lead of 3, and 350+ hours teaching UI/UX.

EXPERIENCE

Product Designer | FLIK — Jul 2023 – Present

One-click checkout and merchant platform (payments, shipping aggregator, QRIS, merchant financing) · Jakarta

- **End-to-end product ownership (late 2025 – present):** with no dedicated PM, own merchant products from requirements (Sales, CEO, merchant feedback) to PRDs, design, engineering briefings and QA in staging and production; plan and send release announcements to targeted merchant segments (SendGrid).
- **Building in code (2026):** building FLIK's dashboard with AI-assisted development (Claude Code), taking features from design to working code.
- **Research (2025 – present):** took on user research at the CEO's request. An unmoderated Maze study (20 participants) explained a **5.15% conversion gap** favouring guest checkout: **68%** chose guest because it *felt* faster, although all valued login rewards.
- Led a 4-phase redesign of FLIK's checkout entry flow (Aug 2023 – Jun 2025): shipped a single-step entry that shows shoppers their potential reward where they pay, after guerrilla testing (10 participants) and 3 validation rounds, and partnered with engineering to extend sessions from **48 hours to 30 days**.
- Redesigned the merchant dashboard and designed new logistics products for FLIK's pivot into a shipping aggregator (expanding to Malaysia and Singapore), contributing to merchant acquisition.
- Founded FLIK's design system; built AI research tooling (Claude Code + Google Apps Script) that turns a research question into a live survey and a synthesised findings deck.

Product Designer (Freelance) | Service-Plus Connect, USA — Dec 2024 – Aug 2025

Two-sided booking platform for customers and service providers · Remote

- Designed the full platform from zero for both customers and providers, defining product strategy and key features directly with the CEO.
- Ran delivery in Jira as the bridge between CEO and developers; supported hiring of the product and engineering team and created investor pitch decks.

Product Designer | GoodHood.SG — Jan 2023 – Jul 2023

Hyperlocal community marketplace · Remote, Singapore

- Owned end-to-end design, turning the CEO's vision into specs, user flows and shipped features; led design QA on every release.
- Ran competitive analysis across local and international platforms to identify differentiation and set feature priorities.

UX Designer | Pegipegi — May 2022 – Jan 2023

Online travel platform (flights, hotels, trains) · Jakarta

- Cut refund disbursement time from **~1 month to ~1 week (76% faster)** by redesigning the manual refund workflow with Finance and CS teams, based on shadowing, interviews and 4 rounds of iteration.
- Led homepage research (user interviews, desirability studies) and redesign; designed the referral program and e-wallet and card management features.

UX Designer | Sekolah.mu — May 2021 – May 2022

Blended learning platform · Remote, Jakarta

- Increased class completion rates by **35%** through a redesigned learning page.
- Led the Academic Dashboard revamp and established its UX standards for academic and operations teams.

Lead UI/UX Designer | Axiata Digital Labs — Dec 2020 – May 2021

Axiata Group's Sri Lanka-headquartered digital consultancy · Promoted from Associate (Dec 2019 – Dec 2020) within 12 months · Jakarta

- Started as the sole UI/UX designer in the Indonesia office, serving multiple local clients with engineers in Sri Lanka.
- Led and mentored a team of **3 designers**, assigning work by strength across concurrent client projects.
- Helped secure **$60K+** in client deals through pitch strategy and live pitches; facilitated client Design Sprints that won follow-on MVP work.

Freelance Product & UX Designer | Remote clients 2022 – 2024

- **Tetanggaku** (Indonesia): sole designer of a 3-app ride-hailing ecosystem (customer, motorbike and car driver apps), reaching **100K+ downloads** and a **4.3★** rating on Google Play.
- **OOSH** (New Zealand): designed flows to publish Facebook, Instagram, TikTok and Snapchat posts to car-mounted digital billboards via the OOSH app.
- **Artpedia** (Indonesia's first NFT marketplace) and **WAWN** (Singapore social app): product detail revamp, launchpad, design system and onboarding.

UI/UX Design Facilitator | Binar Academy, Cakap 2022 – 2024

- Taught **350+ hours** of UI/UX (research, design thinking, Figma, prototyping, portfolios) to graduates and career-switchers.

SELECTED CASE STUDIES

- **Redesigning one-click checkout (FLIK)** — 4 research rounds that reframed a guest-vs-login conversion gap as a value-proposition problem.
- **Refunds: 1 month to 1 week (Pegipegi)** — Shadowing Finance and CS teams to redesign a manual back-office workflow.
- **A 3-app ride-hailing ecosystem, solo (Tetanggaku)** — Customer and driver apps from zero to 100K+ downloads and 4.3★.
- **AI research & PRD automation (GitHub)** — Claude Code and Apps Script tools: prompt → survey → synthesis deck; PRD drafting; Playwright QA.

SKILLS & TOOLS

Product & UX: Product design, interaction design, design systems, rapid prototyping, design QA, Design Sprints

Research: Usability testing (moderated, unmoderated, guerrilla), interviews, shadowing, heuristic evaluation, A/B and concept testing, competitive analysis

AI & build: Claude Code, ChatGPT, Google Apps Script, Playwright, HTML/JS, GitHub

Tools: Figma, Maze, Jira

EDUCATION

B.Eng. Computer Engineering | Telkom University 2015 – 2019

IEEE publication: *Fire Detection Using Image Processing Techniques with Convolutional Neural Networks*
