Product Designer & Researcher with 6+ years of experience building and scaling digital products in fintech, marketplaces, logistics, and commerce platforms. Combines product discovery, user research, business analysis, UX design, and AI-assisted workflows. Experienced in leading end-to-end product initiatives, from requirement gathering, PRD creation, stakeholder alignment, design execution, QA validation and engineering collaboration. Currently leading FLIK's growth as a leading merchant ecosystem enabler.

WORK EXPERIENCES

Product Designer & Researcher | FLIK

Jul 2023 - Present | Jakarta, Indonesia

- Boosted checkout conversion rates by leading end-to-end research and design improvements, combining **hybrid usability testing** (guerrilla and unmoderated) with **AI-assisted research** workflows to plan studies, synthesize and design.
- Partnered with Operations, Sales, and Engineering teams to gather requirements, identify business needs, and translate them into actionable specifications and user-centered solutions.
- Leveraged **AI-assisted** workflows throughout product discovery, requirement definition, design exploration, and documentation to improve speed, consistency, and decision-making quality.
- Played a key role in FLIK's strategic pivot into a shipping aggregator by redesigning the merchant dashboard and introducing new logistics-related products, contributing to increased merchant acquisition.
- Initiated and helped establish the design system to improve design consistency, scalability, and design-to-development efficiency across the product.

Product Designer | GoodHood.SG

Jan 2023 – Jul 2023 | Remote, Singapore

- Translated strategic vision from the CEO into concrete design solutions and feature specifications for product development.
- Conducted competitive analysis across local and international platforms to identify gaps, differentiation opportunities, and feature priorities.
- Owned **end-to-end design execution**, from defining user flows and interaction patterns to aligning design decisions with business goals.
- Worked closely with developers to define design requirements, ensure feasibility, and maintain alignment throughout implementation.
- Led design QA by reviewing implemented features for both visual accuracy and functional usability, ensuring a polished and consistent user experience.

UX Designer | Pegipegi

May 2022 – Jan 2023 | Hybrid, Jakarta

- Boosted disbursement process **efficiency by 76%** by redesigning the cash-out flow, reducing operational friction and manual handling.
- Led research and redesign of the homepage, using user interviews and desirability studies to improve content hierarchy, navigation clarity, and user engagement.
- Designed and launched a referral program to support user acquisition and retention initiatives.
- Designed and implemented e-wallet and credit card management features, improving payment flexibility and user convenience.

UX Designer | Sekolah.mu

May 2021 – May 2022 | Remote, Jakarta

- Increased class **completion rates by 35%** through a redesigned learning page for a more engaging user experience.
- Led the revamp of the Academic Dashboard, improving usability and efficiency for academic and operational teams.
- Established UX standards for the Academic Dashboard, ensuring consistency, scalability and ease of use.

- Owned end-to-end UX design for academic-related features, translating complex business and academic requirements into clear user flows and low-fidelity designs.

Lead UI/UX Designer | Axiata Digital Labs

Dec 2019 – May 2021 | Jakarta, Indonesia

- Played a key role in securing client **deals valued at \$60K+** by supporting pitch strategy, crafting design narratives, and presenting solutions during pitch sessions.
- Owned end-to-end UI/UX design across multiple client projects in a fast-paced IT consulting environment, working closely with business, engineering, and client stakeholders.
- Led and mentored a team of **three junior designers**, efficiently managing resources and guiding them to effectively contribute to key project deliverables.
- Facilitated **Design Sprints** with clients to define problems, explore solutions, and validate ideas quickly before development.
- Earned exceptional **client trust** and secured continued collaboration for the next MVP phase based on demonstrated high design quality and effective expectation management.

EDUCATION

Computer Engineering | 2015 - 2019

Obtained a Bachelor's Degree from Telkom University with a **GPA of 3.14** and [international publication \(IEEE\)](#)

SKILL

Product & UX Design

Product Design, UX/UI Design, Interaction Design, Design Systems, Rapid Prototyping, High-Fidelity Design, Design Thinking

User Research & Validation

User Research, Usability Testing, Heuristic Evaluation, A/B Testing, Guerrilla Testing, Desirability Studies, Concept Testing, Competitive Analysis

Product Delivery & Collaboration

Agile Product Development, Design Sprint, Business Analysis, Stakeholder Alignment, Cross-functional Collaboration, Design-to-Development Handoff

AI & Modern Design Workflows

AI-assisted research planning and synthesis, AI-supported rapid prototyping, Prompt-driven UX exploration, Accelerated insight generation and design recommendation
