***Product Designer*** with almost 7 years designing checkout, payments and marketplace products for teams in Indonesia, Singapore, Sri Lanka, the US and New Zealand. At FLIK I own merchant products end to end, from requirements and PRDs through design, QA and launch, and build in code with AI-assisted development (Claude Code). Research-led, using funnel data, shadowing, unmoderated and guerrilla testing. Computer Engineering graduate, former design lead of 3, and 350+ hours teaching UI/UX. Based in Jakarta (UTC+7), open to remote work.

**WORK EXPERIENCE**

## Product Designer | FLIK

**Jul 2023 – Present** | Jakarta, Indonesia

- ***End-to-end product ownership*** (late 2025 – present): with no dedicated PM, own merchant products from requirements (Sales, CEO, merchant feedback) to PRDs, design, engineering briefings and QA in staging and production; plan and send release announcements to targeted merchant segments.
- ***Building in code*** (2026): building FLIK's merchant dashboard with AI-assisted development (Claude Code), taking features from design to working code.
- Led user research at the CEO's request: an unmoderated Maze study (20 participants) explained a ***5.15% conversion gap*** favouring guest checkout, as 68% chose guest because it *felt* faster although all valued login rewards.
- Led a 4-phase redesign of the checkout entry flow (Aug 2023 – Jun 2025), shipping a single-step entry that shows shoppers their potential reward where they pay, and worked with engineering to extend login sessions from ***48 hours to 30 days***.
- Redesigned the merchant dashboard and designed new logistics products for FLIK's pivot into a shipping aggregator (expanding to Malaysia and Singapore), contributing to merchant acquisition.
- Founded FLIK's ***design system***, and built AI research tooling (Claude Code + Google Apps Script) that turns a research question into a live survey and a synthesised findings deck.

## Product Designer (Freelance) | Service-Plus Connect

**Dec 2024 – Aug 2025** | Remote, United States

- Designed a two-sided booking platform from zero for both customers and service providers, defining product strategy and key features directly with the CEO.
- Ran delivery in Jira as the bridge between the CEO and developers; supported hiring of the product and engineering team and created investor pitch decks.

## Product Designer | GoodHood.SG

**Jan 2023 – Jul 2023** | Remote, Singapore

- Owned ***end-to-end design*** for a hyperlocal community marketplace, turning the CEO's vision into specs, user flows and shipped features.
- Ran competitive analysis across local and international platforms to identify differentiation and feature priorities, and led design QA on every release.

## UX Designer | Pegipegi

**May 2022 – Jan 2023** | Hybrid, Jakarta

- Cut refund disbursement time from about a month to a week, ***76% faster***, by redesigning the manual refund workflow with Finance and Customer Service teams, based on shadowing, interviews and 4 rounds of iteration.
- Led homepage research (user interviews, desirability studies) and redesign; designed and launched the referral program and e-wallet and card management features.

## UX Designer | Sekolah.mu

**May 2021 – May 2022** | Remote, Jakarta

- Increased class ***completion rates by 35%*** through a redesigned, more engaging learning page.
- Led the Academic Dashboard revamp and established its UX standards for academic and operations teams.

## **Lead UI/UX Designer** | Axiata Digital Labs

**Dec 2019 – May 2021** | Jakarta, Indonesia

- Started as the sole UI/UX designer in the Indonesia office and was ***promoted from Associate to Lead within 12 months*** (Dec 2020).
- Led and mentored a team of ***three designers***, assigning work by strength across concurrent client projects with engineers in Sri Lanka.
- Helped secure ***client deals worth $60K+*** through pitch strategy, design narratives and live pitches; facilitated client Design Sprints that won follow-on MVP work.

## **Freelance Product & UX Designer** | Remote clients

**2022 – 2024**

- ***Tetanggaku*** (Indonesia): sole designer of a 3-app ride-hailing ecosystem (customer, motorbike and car driver apps), reaching 100K+ downloads and a 4.3★ rating on Google Play.
- ***OOSH*** (New Zealand): designed flows to publish social media posts to car-mounted digital billboards. ***Artpedia*** and ***WAWN***: product detail revamp, launchpad, design system and onboarding.

## **UI/UX Design Facilitator** | Binar Academy, Cakap

**2022 – 2024**

- Taught ***350+ hours*** of UI/UX (research, design thinking, Figma, prototyping, portfolios) to graduates and career-switchers.

### EDUCATION

## **Computer Engineering** | Telkom University

**2015 – 2019** | Bandung, Indonesia

Bachelor of Engineering with a ***GPA of 3.14***. IEEE publication: *Fire Detection Using Image Processing Techniques with Convolutional Neural Networks*.

### SKILLS

**Product & UX Design**

Product design, interaction design, design systems, rapid prototyping, design QA, Design Sprints

**User Research & Validation**

Usability testing (moderated, unmoderated, guerrilla), interviews, shadowing, heuristic evaluation, A/B and concept testing, competitive analysis

**AI & Building**

Claude Code, ChatGPT, Google Apps Script, Playwright, HTML/JS, GitHub

**Tools & Languages**

Figma, Maze, Jira · English (professional working), Indonesian (native), German (learning)
